

COVID-19 COMPANY PROCEDURES

Alberta Transmission is deemed an essential service as we repair and maintain equipment used in many other essential industries. We are committed to ensuring the safety of our staff, customers, and loved ones as we continue to provide our services. We are following all recommended protocols as they are announced.

- Staff who have travelled or experiencing any symptoms are staying home and isolating for 14 days
- Hand sanitizer has been placed around the business for staff and customer use
- Technicians wear gloves when performing service work
- Office staff are wearing disposable gloves when dealing with customers
- Social distancing is being practiced on site (it's an 8000sqft shop with only a few employees, this one is easy!)

We look forward to continuing to serve our customers while also taking every necessary precaution to ensure everyone's safety.

Regards,

Alberta Transmission Management
